- Relentless drive to win
Here is a glimpse of what you'll do:
- Creates, implements and finalizes engineering change orders (ECO's) and makes system changes.
- Performs file maintenance of BOM's, parts drawings, ECO's, process alerts and other customer documents.
- Coordinates ECO status with customer and implements cost changes and effective dates.
- Ensures projects are in compliance with document control policies and procedures.
- Ensures data accuracy and completeness of documentation including logs, reports and distribution.
- Manages and tracks product configuration and manufacturing/customer requirements.
- Responsible for interface between program manager, engineering, manufacturing and materials to ensure appropriate changes are documented.
- Collects and reports process performance metrics.
- Track work completed by customer program for reporting purposes.
Here is some of what you'll need (required):
- B.E/B.Tech(EEE/ECE) 2017/2018 graduates with no arrears.
- 0 – 2 years of experience as a NPI/ECO Engineer in a BPO or Manufacturing set up.
- Sound knowledge on technical subject.
- Good communication and analytical skills.
- Flexible to work in any time zone.
Here are a few of our preferred experiences:
- Knowledge of MS office and MS outlook.
- Should be very sincere, dedicated and good team player.
- Very studious, fast learner and able to adapt to an industry environment
