Job Details

Roles and Responsibilities:

- Work in a team to develop, compile, test, debug & deploy software Develop web and mobile applications using Javascript, Python, HTML and CSS
- Ensure close to 100% timely & defect-free software deployments
- Write documentation for the software and APIs
- Support software during production and provide hot fixes

Specific Requirement:

- We are blind to all factors like educational qualifications, degree, college, gender, religion, caste, age etc. We only hire on skill and competence, and programming capability is the overwhelming component of our evaluation. The only other factor is communication skills, to which we assign a small weightage
- MountBlue is a premium software development services provider. We work closely with startups and small/medium enterprises to launch their products. Leveraging agile methodology for software development and popular open source technologies, we turn our customers' vision into reality. We are an exclusive service provider- our customers do not choose us, we choose our customers
