### **CIRCULAR**

**Date: 03/10/2020**

### **BAN OF PLASTIC IN DRTTIT CAMPUS**

India generates about 9.4 million tons of plastic waste each year and with no effective disposal method, the plastic waste ends up the roadside in landfill and water bodies. Plastic waste management is a global concern adversely impacting the soil, water, health and well-being of citizens at large.

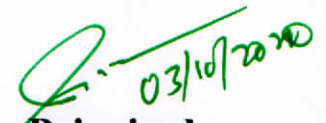

India is set to improve a national wide ban on single use plastic and the goal to make India free of single use plastics by 2022.

As the educational institution have the unique spread and influence to educate the students and households on the need for avoiding usage of single use plastics.

These are the steps to be followed to make Dr TTIT plastic free campus:

1. Dr TTIT ban the use of single use plastics in canteen and in campus.
2. Mandate all to avoid bringing non-biodegradable plastic items to the institution.
3. Encourage the students to sensitize their respective campus about harmful effects of plastics and make their campus plastic free.

**Dr TTIT already installed necessary alternative facilities like water units to avoid the use of plastic water bottles and encourage use of alternative solutions like biodegradable plastic items and other goods on campus.**

### **Guidelines for Landscaping with plants**

The following steps are followed to implement green campus in Dr TTIT:

- A plant is planted on all important events and celebrations in Dr. TTIT campus.
- To reduce local air pollution, use environment-friendly vehicles, including college transportation and use of pedestrian-friendly roads.
- To implant rain water harvesting unit.
- Placing dustbins in appropriate areas for disposal of wastes in the campus and in hostels.
- Minimum or no use of plastic is practiced by students, staff and faculty in campus.
- Dispose the chemical waste generated from the laboratories in a scientific manner.
- Display waste management instructions/ alerts at prominent places in campus.
- Promote the efforts for the conservation of waste into renewable energy.
